

Genesee County Drain Commissioner Division of Water and Waste Services Determination of Industrial User (IU) Significant Noncompliance (SNC)

The pretreatment year is January 1st to December 31st.

The pretreatment year is broken into four quarters. First quarter is January, February and March, second is April, May and June, third is July, August and September and fourth is October, November and December.

At the end of each quarter all IUs are evaluated for SNC per 40CFR.403.8(f)(2)(vii)(A) and (B). The time frame for the evaluation is the previous six months. For example at the end of first quarter the samples from October – December of the previous year along with January – March of the current year will be evaluated. At the end of second quarter (June 30th) the time frame for evaluation is January – June, and likewise for the following quarters.

First Evaluation Period

End of previous year			Beginning of current year		
Oct	Nov	Dec	Jan	Feb	Mar

Second Evaluation Period

End of previous year			Beginning of current year		
Jan	Feb	Mar	Jan	Feb	Mar

Significant Non-compliance (SNC) will be addressed within 30 days of becoming aware of the non-compliance. A SNC report for each industry is produced each quarter. This report will be used to help indicate if an industry is in significant non-compliance.

Notices of noncompliance will be sent to all non-complying industries by certified mail. Those industries in significant noncompliance will be notified of their status and informed of pending publication of their non-compliant status in the Flint Journal.

GCDCWWS shall publish once per year in the largest newspaper circulated in the County, a list of IUs that, at any time during the previous 12 months, were in significant noncompliance with applicable pretreatment standards or requirements. The SNC article is published before April 1st of each year.
